Why CyberDragons?

GSMST CyberDragons   GSMST Computer Science Club

Dear companyName,

CyberDragons is a competitive cybersecurity organization from the Gwinnett School of Math, Science, and Technology (GSMST) seeking to nurture the next generation of ethical hacking professionals. We cover operating system security, cryptography, digital forensics, network security, and offensive hacking techniques. Through hands-on experiences, our members gain expertise in areas such as intrusion detection, secure code writing, and incident response. We also ensure they understand concepts like the principle of least privilege, common attack vectors, and online safety measures.

However, many of our members face financial challenges, hindering their ability to participate in cybersecurity competitions. We are seeking donations to enable us to send multiple teams to various events. Additionally, we are in need of professional coaching and mentorship. While our students have shown exceptional dedication and talent, guidance from experts in the field would significantly enhance their skills. Finally, we would love to have our members as interns in your company, which would align with the Junior Fellowship Experience and the Senior Capstone Experience, which are experiential learning courses required to graduate GSMST. This practical experience will not only enrich their passion for cybersecurity but provide your organization with dedicated and talented individuals to contribute to your success.

Your support can take various forms. Financial contributions would facilitate our participation in competitions, enhancing our learning experiences and networking opportunities. If you wish to contribute financially, please make checks payable to GSMST Computer Science Club and send them to the following address:

970 McElvaney Ln NW, Lawrenceville, GA 30044.

For inquiries about payment, please contact our teacher sponsor, Julia Rachkovskiy.

Thank you so much for your consideration. We look forward to hearing from you!

Sincerely,

– GSMST CyberDragons
